

Nowadays just like catastrophe, a lot of earthquakes occur all over the world. Geological expert says there is an active fault here in two-cities and two towns.

# AN EARTHQUAKE

Please remember 6 key points to be prepared for an earthquake

The Great Hanshin Earthquake, last Niigata Chuetsu Earthquake, and next one may occur directly underneath the south Kanto district

**Point one** Protect your family and yourself.

If you feel tremor, stay there and assure safety of your family and yourself. Major tremors do not last longer than one minute.

**Point three** Secure an exit by keeping door or window open.

Secure an exit for evacuation after major tremors stop. Door may be warped and doesn't open properly.

**Point five** Move away from gate or block wall

If you're outside in an earthquake, move away quickly from block wall or the like not to be crushed under the fallen block wall or bending machine. Be careful for children who are liable to be the victims of accidents.

**Point two** Turn out the fire ASAP.

If major tremors stop, turn out all sources of fire immediately. Even if it is a small earthquake, get into a habit of turning out all fires and a circuit breaker if possible.

**Point four** Do not rush outside

Move carefully after the shaking stops and watch out for things such as windowpane or roofing tiles that have been fallen or broken, creating hazards.

**Point six** Get accurate information and behave calmly.

Do not go into a panic or react hastily to inaccurate information.

Pay attention to information given on radio and television, or by the fire department and city office.

Always you're your nearest refuge area for your family and yourself.

## Foreign residents advisory center

You may have a problem, but you don't have any one to talk with it. It depresses you and keeps by yourself. Foreign residents advisory center (FICEC), which is a representative of Fujimishi, Kamifukuokashi, Oimachi, and Miyoshimachi, offers you an opportunity to give you an appropriate advice. If you have any problem, please do not hesitate to ask us. We also provide you an emergency shelter. Free of charge for consultation. Call

0 4 9 2 5 3 7 7 4 4

## You don't need to watch keyboard any more. PC Typing Class

"Touch typing" is skill of inputting data (letter or symbol) into a computer watching display instead of keyboard. Using 10 fingers freely like playing musical instrument, you can fill the display.
