

Immigration law is revised and executed

● Key point of Immigration law

- (1) Workers staying in Japan can work longer even with simple work. Also, a new qualification called Specialized technique No.2 is established so that you can have permission of permanent residence and call your family in Japan.
- (2) “Immigration Services Agency” is established so that to deal quickly for various problems of foreign workers staying in Japan.

Technical Interns (Persons who are learning techniques while working as interns)
 ⇒⇒ Interns who worked 3 years

Person other than technical intern, who wants to work for the first time in Japan
 ⇒⇒ Should pass Japanese language test (N4) (should be able to speak daily conversation in Japanese) and technical test

Specialized technique No. 1 (Staying time is 5 years for the longest)

- ★ Your family cannot stay together.
- ★ This qualification is available for 14 works such as agriculture, construction industry, nursing, and others.

If you have ability in Japanese language and pass more difficult technical test, you can have specialized technique No.2 (without time limit for staying in Japan)

- ★ Construction industry and shipbuilding industries are the target work for specialized technique No.2.
- ★ Limit of staying Japan can be extended by taking a regular inspection enabling permanent residence.
- ★ You can call your family (your spouse and children).
- ★ Specialized technique No.2 is more difficult to acquire than No. 1 because it needs higher Japanese ability and more skill.

Q	Works which you can get Specialized technique No.1 qualification
A	Following 14 works: 1. Nursing work 2. Food service industry 3. Construction industry 4. Building cleaning work 5. Agricultural industry 6. Food and drink manufacturing industry 7. Accommodation industry 8. Stuff to principle forms industry (Works to make mechanical parts by melting metal powder and molding it) 9. Shipbuilding industry 10. Fishing industry 11. Automobile maintenance 12. Manufacturing industrial equipment work 13. Electronic information industry 14. Airfreight industry
Q	How can current technical interns get Specialized technique No. 1 qualification?
A	If you have been worked for 3 years as technical interns you can have the qualification without taking an exam.
Q	I am a technical intern now. How long can I work when I get Specialized technique No.1?
A	Technical intern can work for 5 year maximum. If you get Specialized technique No.1, you can stay for 5 years at maximum. However, you cannot call your family.
Q	Can foreign students studying in Japan be also qualified?
A	After graduated and pass the Japanese language test (N4) and approved to have a certain technique and knowledge in one of the above 14 works, it can be qualified as specialized technique No. 1.
Q	What is the major point of this system?
A	(1) There are two types of specialized technique and you can stay 10 years at most or you can have permanent resident qualification when you have it. (2) Salary is the same as that of Japanese or more.
